

Title: Report on Murder

Author: Odoital

---

After consulting my sources and using my alchemy lab, I have determined that the boy was indeed murdered.

However, it might be noteworthy that the body of the murdered

boy was not a real body at all. It was a really excellent copy or clone of a human body with one flaw. When the substance peroxcide is mixed with blood, either live

or dead, it produces a bubbling reaction.

When I tested the blood with peroxcide, amongst several other substances, no bubbling reaction took place.

Therefore, the

conclusion I have drawn is that this is not real blood, therefore this body given to me is not a real humanoid, but either a copy or some sort of other lifeform

unknowngst to me . It is not a changeling because the body did not revert to its original shape, like I would if I were slain.
